**BO!**

# GIRAFFE

Will your tongue  
be as blue  
as a giraffe's  
if you eat enough  
blueberries?

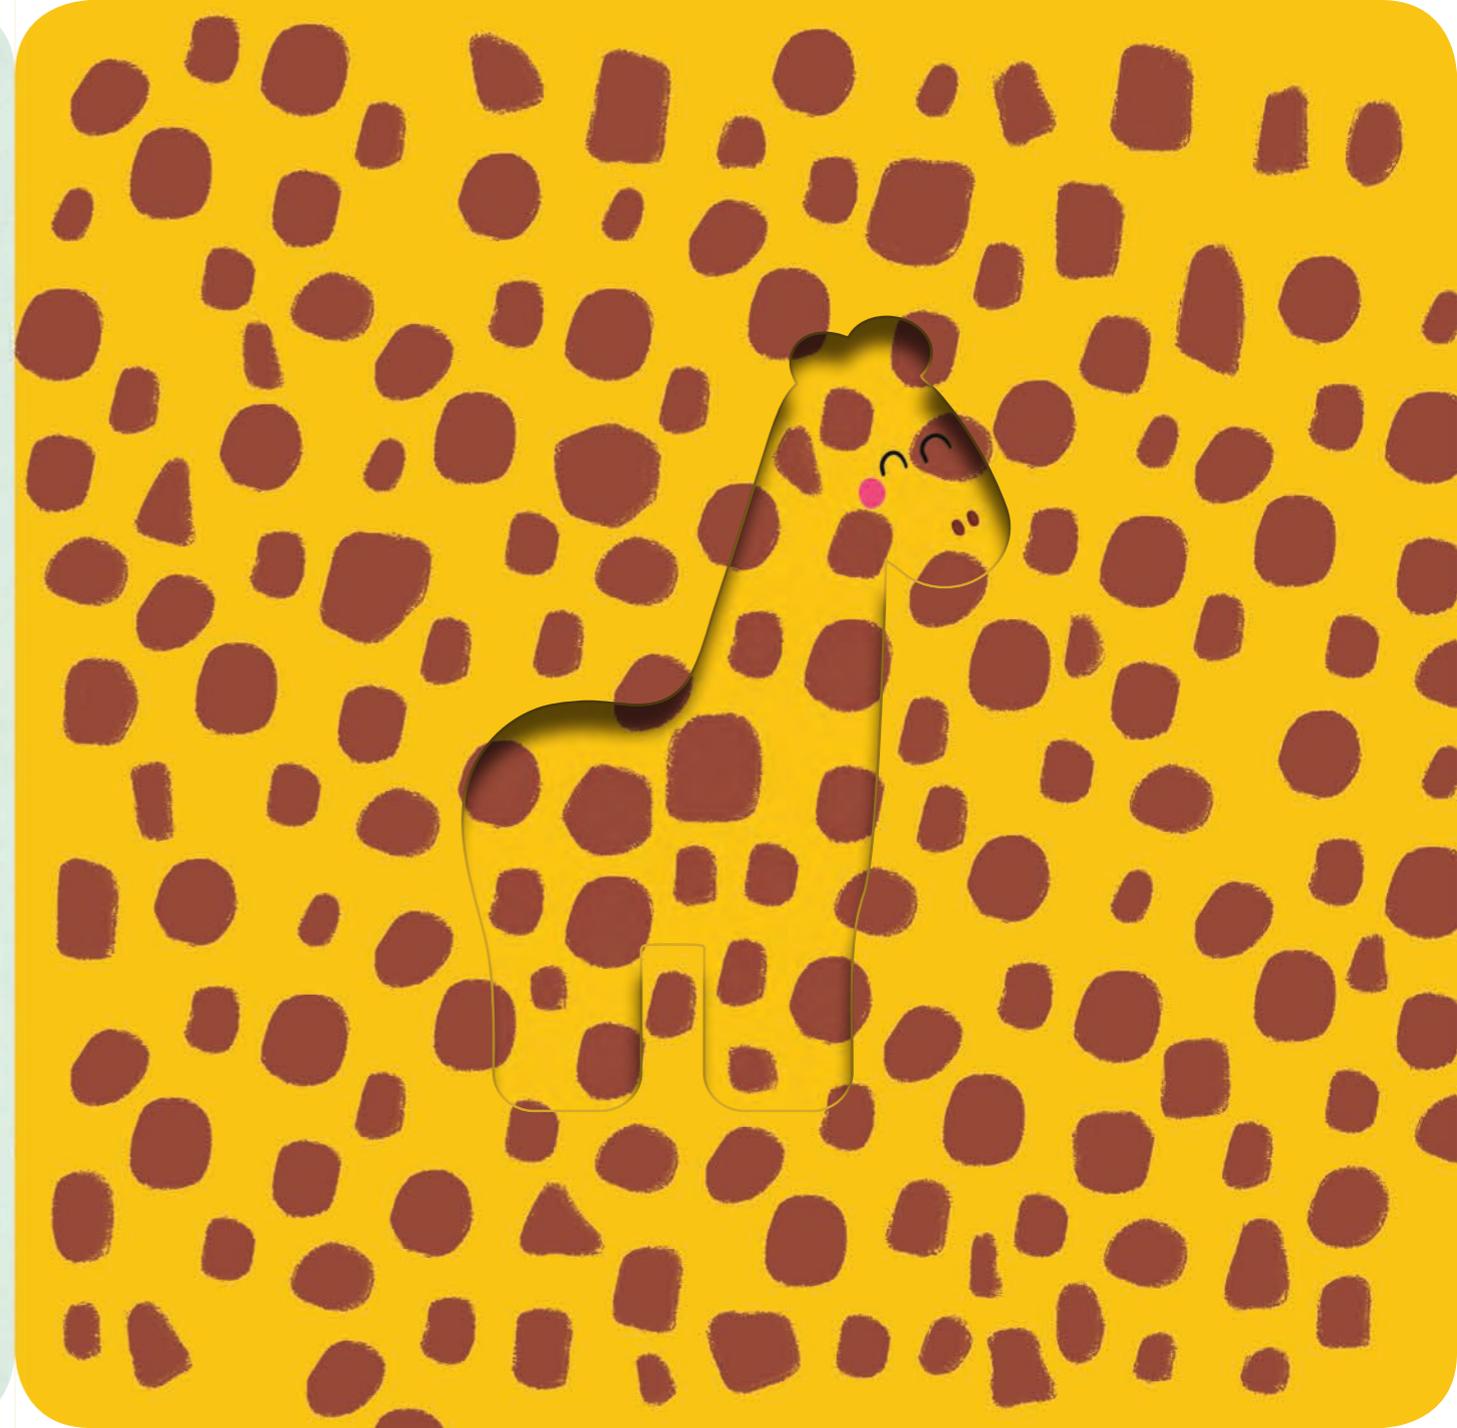

Which disguise  
would a giraffe  
choose if it were  
to attend  
a carnival?

Each giraffe is a gymnast  
of sorts - otherwise  
it wouldn't be able to drink!

Did you know that giraffes  
are the tallest animals  
in the world?

A seemingly endless neck makes hiding difficult, but some giraffes managed to hide anyway. Can you discover 7 of them on this page?

Long neck enables giraffes to reach fresh leaves all the way up at the treetops.

**DO YOU KNOW** why tigers have striped fur? Because in order to discreetly crawl through jungle they need to merge with their surroundings. Ladybirds, on the other hand, use their red shards to scare off anyone who might want to eat them, and to send out a warning: "Don't eat me, I'm poisonous!" Animals have bodies decorated with various colours and patterns. This protects them from danger, or helps them hunt.

**SEVERAL ANIMALS HAVE HIDDEN INSIDE THIS BOOK. WOULD YOU LIKE TO HAVE A NICE TIME WITH THEM?**

- Find the animals that are playing hide-and-seek with you.
- Trace an animal's outline on paper, and colour it.
- Take a look at animals' natural environment.
- Lay a piece of paper on an animal-shaped protrusion and make a picture with quick pencil strokes.

GIRAFFE

ZEBRA

LADYBIRD
