

WILL YOU HELP
THE LOST LITTLE
FAWN FIND ITS
MUMMY?

Whose TRACK Is It ?

Could Mummy Deer wander all the way to the farm? There are some footprints leading there and maybe she left them behind. Her little son is missing her already but will he have the courage to follow the footprints to the yard?

The cat can sneak totally silently thanks to its soft pads on its paws. When walking it also pulls in its claws so that they don't get worn away. They will come in handy when it goes and hunts for food.

HAVE YOU SEEN ANY OF THESE FOOTPRINTS BEFORE?

HUMAN DWELLINGS OFFER DIFFERENT SHELTERS THAN NATURE. WHERE DID THESE ANIMALS HIDE?

TINY FEET ALLOW THE **BLACKBIRD** TO SIT CONFIDENTLY EVEN ON THE SMALLEST BRANCH.

SOMETHING STIRRED UNDER THE HEAP OF HAY, BUT IT IS ONLY THE **CAT** DOZING OFF THERE.

Could Mummy Deer wander all the way to the farm? There are some footprints leading there and maybe she left them behind. Her little son is missing her already but will he have the courage to follow the footprints to the yard?

CONTRARY TO OTHER BIRDS, **HENS** CANNOT FLY VERY WELL AND THAT'S WHY IT IS EASY TO FIND THEIR FOOTPRINTS ON THE GROUND.

SOFT PADS ON **DOG** PAWS FUNCTION AS PROTECTORS WHICH ABSORB THE IMPACT OF WALKING AND JUMPING.

The cat can sneak totally silently thanks to its soft pads on its paws. When walking it also pulls in its claws so that they don't get worn away. They will come in handy when it goes and hunts for food.

HUMAN DWELLINGS OFFER DIFFERENT SHELTERS THAN NATURE. WHERE DID THESE ANIMALS HIDE?

Could Mummy Deer find her little son? There are many places to hide on the farm. Can you help Mummy Deer find her little son? There are many places to hide on the farm. Can you help Mummy Deer find her little son? There are many places to hide on the farm. Can you help Mummy Deer find her little son?

GOATS HAVE SKILLFUL LEGS AND KEEP BALANCE WELL. AFTER ALL, THEY ARE RELATED TO THE NIMBLE MOUNTAIN CHAMOIS.

Life in the mountains is not easy. The animals there have to survive even on difficult terrain or during the harsh winter. Where are they, though? There's nobody here, just somebody's footprints on the ground again.

The bear mostly moves only slowly and calmly. It doesn't mean, though, that it cannot speed up! And when it wants to, thanks to its skilful paws, it can climb even a tree without any problems.

WHAT OTHER ANIMALS LEAVE THEIR FOOTPRINTS IN THE MOUNTAINS?

LOOK! WHERE HAS EVERYBODY GONE? WILL YOU FIND THEM?

OH NO, THE FOOTPRINTS BELONG TO A BIG **BEAR**! LET'S GO AWAY QUICKLY, IT MIGHT BE HUNGRY.

WIDE PAWS ARE EXCELLENT HELP IN THE SNOW. THANKS TO THEM THE **WOLF** DOESN'T FALL THROUGH IT TOO FAR.

The bear mostly moves only slowly and calmly. It doesn't mean, though, that it cannot speed up! And when it wants to, thanks to its skilful paws, it can climb even a tree without any problems.

GONE? WILL YOU FIND THEM?

THE **EAGLE OWL** CAN AT WILL POINT
ONE OF ITS TOES FORWARDS OR
BACKWARDS. THIS MAKES IT EASIER
FOR IT TO CATCH PREY AND TO MOVE
IN THE BRANCHES EASILY.
